Technical Stack

Backend & APIs: Python · FastAPI · Django · REST APIs · Pydantic · SQLAlchemy · SQLModel · Alembic · WSGI / ASGI · Uvicorn

Databases: PostgreSQL · SQL · SQLite · Supabase · Data Modeling · Migrations

Cloud & DevOps: AWS (EC2, EBS) · Docker · Docker Compose · GitHub Actions · CI/CD · nginx · Linux

Machine Learning: Scikit-learn · Forecasting · Classification · Regression · Deep Learning / CNNs · Model Evaluation

Data & ETL: Pandas · NumPy · ETL Pipelines · Parquet · Data Validation

Frontend: React · TypeScript · Vite · Streamlit

Testing & Tools: pytest · ruff · mypy · Git · GitHub · VS Code · Jupyter

BI & ERP: Power BI · DAX · Power Query · SAP · QAD · MRP

Languages

Spanish (Native)
English — B2

PROFESSIONAL PROFILE

I'm a Machine Learning Engineer and developer with a background in Physics Engineering. I design, build, and deploy production software systems: APIs, web applications, and machine learning solutions integrated into real business processes. At Herinox, I develop SAP-connected platforms used across 11 branches; previously, at Safran, I worked on automation and data analysis for aerospace manufacturing.

EDUCATION

2019 – 2024 | **B.Sc. in Physics Engineering**

GRADUATE — Autonomous University of Chihuahua, Faculty of Engineering

PROFESSIONAL EXPERIENCE

HERINOX — Chihuahua, Mexico · Apr 2026 – Present

- **Machine Learning Engineer & Developer** — Aug 2026 – Present
  - As the development lead at Herinox, I design, build, and maintain enterprise applications integrated with SAP Business One (HANA) across 11 branches.
  - Built a quotation platform with SLA tracking and 900+ automated tests, alongside a sales analytics system with 53 real-time KPIs.
  - Developed ML solutions for product classification and sales, demand, and inventory forecasting.
  - Deploy and maintain applications on AWS using Docker, GitHub Actions, and a site-to-site VPN for SAP connectivity.
- **Data Scientist** — Apr 2026 – Aug 2026
  - Built profitability dashboards and margin analysis tools for 11 branches, processing 12,000+ monthly sales line items.
  - Automated pricing workflows and SAP document processing using Python, FastAPI, and React.

EO TECHNOLOGIES — Freelance · Remote · Jan 2024 – Present

- **Full-Stack Developer**
  - Design and develop custom web and mobile applications, integrating APIs, databases, and cloud services to automate business processes.

SAFRAN AEROSYSTEMS — Chihuahua, Mexico · Dec 2024 – Apr 2026

- **Manufacturing Engineer 4.0** — Jul 2025 – Apr 2026
  - Led the automation of a manual electric-torque process, introducing digital traceability and reducing torque-related defects.
  - Applied Python and machine learning to production monitoring, anomaly detection, and process improvement in aerospace manufacturing.
- **Project Engineer Intern** — Dec 2024 – Jun 2025
  - Supported production-line transfers from Niort, France, implementing Industry 4.0 solutions and standardizing manufacturing processes.

PROJECTS

- **Special Orders Quotation Platform** – *FastAPI · React · TypeScript · PostgreSQL · Docker*
  Built a quotation platform for 11 branches, tracking purchasing response times through multi-timezone business-hour SLAs and quoted versus confirmed revenue.
  GitHub Private | Web App
- **Sales Intelligence Platform** – *FastAPI · React · TypeScript · SAP HANA · PostgreSQL*
  Developed a sales analytics platform with 53 KPIs, secure role-based access, and real-time reporting integrated with SAP Business One.
  GitHub Private | Web App
- **Melanoma Classification — Research** – *PyTorch · EfficientNetV2-S · FastAPI · ONNX*
  Developed a melanoma classification research pipeline with reproducible training, Grad-CAM explainability, and an ONNX inference API.
  GitHub Public

ACHIEVEMENTS

- Presenter, 67th National Physics Congress (2024)
- Participant, 66th National Physics Congress (2023)
- 1st Summer of Scientific Research (2023)
- Vice President, Student Council UACH

VOLUNTEER

- Mathematics & Physics Mentor, UACH outreach programmes (2019 – 2024)
